

Alka75

What can help your body maintain optimum health, tastes great, is completely natural, both hydrates and detoxes your body, promotes a neutral pH level in the body and requires no extra effort on your part...

-Alkaline Water!

**optional faucet styles: QMP2011, QMP2011D, QMPC7 – Several different colors and finishes are available!*

How does the Alka75 work?

When water passes through the filters in this system, it breaks up the clusters of water molecules into smaller clusters. This makes it easier for your body to absorb so you stay better hydrated.

Naturally occurring in our bodies, oxygen free radicals (which are missing electrons) which in order to survive, they will steal from normal, healthy cells. By drinking all-natural alkaline water, which is right with antioxidants, you are introducing extra electrons to your body. Keep your family healthy by drinking alkaline water from the Alka75!

Why alkaline water?

Alkaline water has a naturally high pH level (8.0-9.5) but the average diet consists of foods which are highly acidic (3.3-5.0). What most people do not know is this overload of acidic foods has been linked to many chronic conditions including diabetes and high blood pressure.

By consuming alkaline water in place of tap water, you can help your body find the natural balance it seeks!

**The alka75 efficiently eliminates or significantly reduces copper, lead, fluoride, cadmium, radium 226/228, selenium, arsenic, cysts, barium, chromium, odor, TDS many more.*

Specifications & Filtration

RED-D

5 STAGES

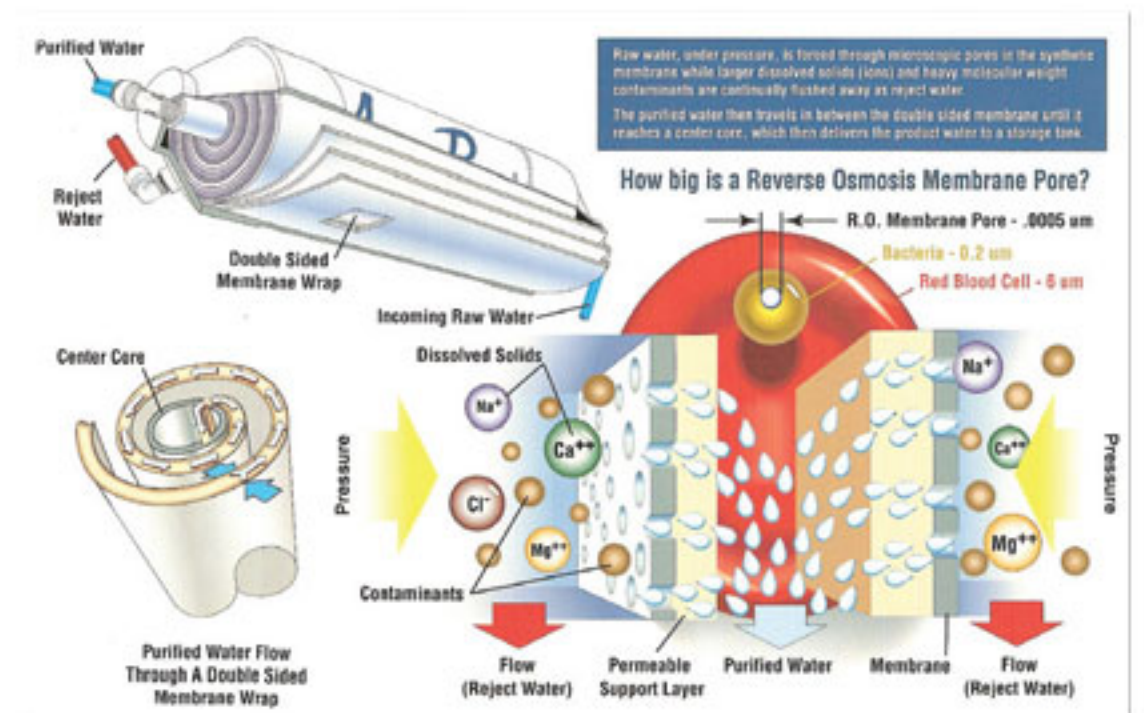

- Capable of removing submicron pathogens and inorganic contaminants through electro adhesion and ion exchange.
- The Protector™ Red-D Ultra filter reduces or removes the following:
 - >99.99% viruses (polio, rotavirus, norovirus, etc.) **
 - >99.99% bacteria (e coli, legionella, pseudomonas, etc.) **
 - >99.95% cysts (giardia, cryptosporidium, etc.) **
 - >95% Lead**
 - >80% Ferrous Iron**
 - >95% Arsenic V**
 - >95% Cadmium**
 - >85% Chromium**
 - >75% Selenium**
 - >60% Mercury
 - Chlorine (carbon version)
 - Bromine (carbon version)
 - Iodine (carbon version)
 - VOCs (volatile organic compounds)
 - PCBs and BPA
 - Residual pharmaceuticals
 - Biofouling precursors: organic acids, proteins, polysaccharides Applications

** Tested by Certified laboratory in U.S. (Testing was done at 6.5pH)

MEMBRANE

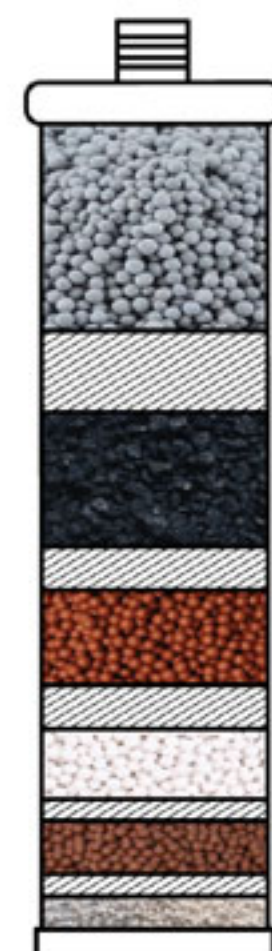

- The reverse osmosis process is primarily used to remove particles and other impurities in the water. This means that all those bad chemicals such as lead and even arsenic are removed from the water.
- The energy usage of reverse osmosis systems is relatively low compared to other similar systems.
- Even some parasites are filtered from the water, protecting you from the possibility of contraction.
- Membrane is the final barrier on contaminant removal.

CARBON

5 STAGES

- Activated carbon coconut shell can remove contaminants, including many VOCs, pesticides and herbicides, disinfection by-products like Trihalomethane etc... Activated carbon coconut shell has a slightly positive charge so it can attract impurities.
- Our catalytic carbon is the best filtration carbon in the world with up to 8 times the surface area of ordinary granular carbon.
- Catalytic carbon for chloramine since most activated carbon filters only remove chlorine.
- Catalytic carbon also removes chloramines and far more VOC's (volatile organic compounds) plus all the usual problematic toxins like volatile organics, trihalomethanes, pesticides, pharmaceuticals and more.

ALKALINE

15 STAGES

- We discovered that ceramic magnets stabilize pH in the water by creating a strong magnetic field to maintain its effect.
- O-Dobi beads were discovered after a decade-long search for the perfect hydrogen and alkalizing natural media. O-Dobi is a ceramic encasing pure magnesium and calcium. It slowly releases these elements to alkalize and to infuse the water with hydrogen gas. Tested to show 3 times the hydrogen compared to any electric ionizer.
- Softer, sweeter and delicious.
- Micro clusters water, infuses hydrogen, remineralizers water, alkalizes and ionizes.

Water conditions that need to be met

Feed Water Condition	Minimum	Maximum
Inlet Pressure	280KPa/40 PSI	600KPa/87 PSI
Temperature	5°C/40°C	7°C/40°C
pH Level	6 pH	11 pH
TDS Level	---	2000 PPM
Working Pressure	280KPa/40 PSI	520KPa/75 PSI

* Non-electronic ionizer.

*Require 2 AA batteries.

Specifications

Width	13.6 in.
Height	16.3 in.
Depth	5.06 in.
Net Weight	26 lbs.
Gross Weight	30 lbs.
Box Size	19 x 19 x 19

Alka75

This exquisite system produces alkaline water with great taste and promotes a balanced pH level in the body.

The first stage of system removes toxins and chemicals from the water and makes the water naturally antioxidant-rich alkaline water.

Features:

- Enjoy pure water.
- Natural source of calcium.
- Maintain an optimal level of health.
- Detoxify your body.
- Provides antioxidant protection.
- Great taste.
