

# Protector Plus

*Experience the difference of clean water without the pesky residue left behind by hard water deposits. Reduce clogging and corrosion of plumbing caused by polluted hard water that is typically used in households. Alleviate the burden of unnecessary spending on scale removal products, moisturizer products, detergent and pipe repairs.*

## What are the differences between soft water and hard water?

### Hard Water

*Disadvantage of hard water is that it costs money.*

- Detergents are not as effective at cleaning.
- Washing clothes and dishes require more detergents.
- Scale buildup degrades water heater efficiency over time.
- Overall appliance lifetime is decreased.
- More cleaning products required to clean scale buildup.
- Dry/ damaged hair and skin unsightly film on glass dishes.
- Clothes fade faster and dingy whites scum, streaks, spots ruin faucets and fixtures.

### Soft Water

*Advantage of soft water is that it saves money.*

- Detergents up to 12X more effective when cleaning.
- Use up to 70% less dish and cloth detergents.
- No scale buildup water heater efficiency is maintained.
- Overall appliance lifetime is maintained less cleaning products required to purchase.
- Moisturized/ healthier skin and hair.
- Cleaner, spot-free glass dishes Cleaner clothes and whiter whites.
- Preserved look of faucets and fixtures.

# Solve your water problems with the efficiency of computerized control.

Protector Plus provides superior quality water. This cost-effective hi-tech system utilizes a computerized control valve to monitor your water usage and maintain optimal effectiveness of the filter media ensuring you always have the highest quality water. The multi-layered filter media tank combines an outer cover of stainless steel with the durability and protection of the additional layers.

Hair and skin are soft and silky

Food tastes better

Dishes are cleaner

Better tasting beverages

## Features:

- No bad tastes or odors
- Cost-efficient operation
- Peace of mind
- Exceptional clarity without turbidity
- Removes hardness
- Extends appliance life
- More flavorsome food
- Smooth and healthy skin
- Clothing maintains its color longer
- Chlorine removal

# Protector Plus

This system uses the highest quality catalytic granular coal in its first stage to remove unpleasant tastes and odors caused by chlorine or organic chemicals. Its careful selection of media removes pesticides, turbidity, and chloramine as compared to carbon systems which typically do not. The second stage softens the water to protect your plumbing and household appliances from scale buildup. This keeps your clothes soft and colors bright as well as your dishes and glassware free of hard water residue.

#### Features:

- No bad tastes or odors.
- Cost-efficient operation.
- Peace of mind.
- Exceptional clarity without turbidity.
- Removes hardness.  
Extends appliance life.
- Pure drinking water straight from the tap.
- More flavorsome food.
- Smooth and healthy skin.
- Clothing maintains its color longer.
- Chlorine removal.
